

# Infomediary / Data Aggregation

www.DataBoiler.com

## What it is?

- Turning cumbersome daily activities to entertain multiple parties' data requests into money making opportunities
- Consolidated view offering higher values than one navigating through the data deluge
- A portal, a venue, a network, or a gateway
- Collaborative exchange
- Deploy among multiple venues
- Crossover and cross-tabulate data to build networks in seeking multitude of opportunities!!

## How you may use it

Examples:

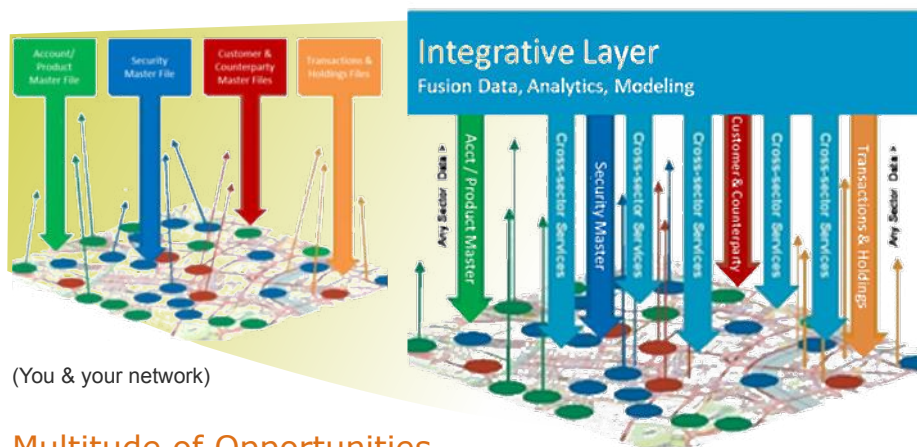

### DCIO data aggregation

- Record keepers save time in preparing multiple spreadsheets to send to multiple parties, get a summary view of all activities, and share a part of the success with margin as high as 80% or more.
- MFs know where their funds are held at TPAs; DCIO firms provide direct support to advisors.
- B/Ds timely knowledge of how much each advisor is flowing, separate DC from retail and/or IRA assets that helps to ensure suitability compliance for the plan, compensation or appropriateness of commissions to advisors, and notify plan sponsors about changes.

**Pre-trade credit-checking for OTC derivatives** that helps institutions to deploy credit lines among multiple clearing venues.  
**Alternate trading platform** to established exchanges and dark pool private venues.

## Why you should care?

*Because synergy is the gratifying reality of 1+1 = 3 or more.*

## Multitude of Opportunities

Usage value multiples as the network expands (a decent market with profit margin as high as 80% or more)

## Our Offerings

### Data Aggregation

- Retrieval
- Format validation
- Data transformation
- Cleanse & normalize
- Processing & Tagging rules
- Data mapping

### Infomediary

- Pick the market to disrupt
